CONSTITUTION AND NATION

All present political parties present platforms based on a shopping basket of policies that they claim will fix the troubles we have. The Constitution Party holds that our problems are so deep-seated that they can only be addressed with a radical new constitution to replace the UK's unwritten one

Constitutions can ONLY apply to nations. This is why the forces we confront use global bodies to enact their aims for such bodies CANNOT by their nature have constitutions that confer rights and freedoms on people and work for their benefit.

Writing the new constitution will take time but the following can be implemented immediately pending integration into the full constitution

Patriotism and love of country will become a central fact of our government and people

EXIT ALL POLITICAL LEGALISTIC INTERNATIONAL ORGANISATIONS

Exit all legalistic political international organisations, the WTO, WHO, BIS, NATO, that become international quasi-governments with no democratic oversight.

END "REVOLVING DOOR" WITH "IRON WALL"

The revolving door between Government and financial and multinational, corporations, but also any large corporation with a dominant market share, must end by creating an IRON WALL between the two. The IRON WALL shall be created by ruling that anyone who enters the government sector, either the democratic element or the civil service element, or the corporate sector shall under no circumstances *for the rest of their lives* move to employment in the other sector. This will virtually eliminate the legalised "corruption" and private corporatism that pervades our society and is so instrumental in its ongoing destruction

RENATIONALISATION

Renationalise natural monopolies, electricity, gas, railways, water, etc

BANKS

The "too big to fail" giant banks of today will be split up and replaced with a plethora [certainly hundreds and maybe thousands] of small banks each with a charter prescribing dedicated roles. Charters will be awarded for specific industries [such as IT or car manufacturing], or specific regions or specific banking operations [such as international exchanges]

Return to mutual building societies being the sole lenders for private housing to avoid the artificial mountain of money chasing mortgage loans, which promote artificially high house prices.

GOVERNMENT BONDS

Repatriate all government bond ownership. The fantasy that the government can return to zero debt is often entertained. This for a variety of reasons cannot happen. When the government owes debt to its citizens [or their proxies like pension funds] this is the nation owing to the nation and so within reason is not harmful. Owing debts to foreigners is a different matter. Also government debt is needed for savings and pensions

CAPITAL CONTROLS

It is a common misconception that the post war boom came to an end because Nixon took the dollar off the gold standard in 1971. The real reason for the end of the boom is that capital controls were loosened. Tight capital controls were the other plank of the Bretton Woods agreement. They meant that profits made in a nation were reinvested in that nation in some form or another. It was this that created the booming post-war economies. Capital controls in the UK were completely abolished by Margaret Thatcher in 1980 which encouraged the vicious downward spiral of British industry.

SOVEREIGN ECONOMICS

A vital part of creating the sovereign nation is economic reform

We need to adopt the "national economics" of Friedrich List and Henry Carey - forgotten names that made Germany and the US powerhouse economies in the 19th century.

List emphasised the "productive powers" of the nation. The planned destruction of industry that has occurred in the UK in the twentieth century would be alien to List

We must totally reject the internationalist, Adam Smith, whose theories lead directly to the hollowing out of UK industry and the primacy of finance which benefits only a few. We must aim for self-sufficiency on all things as far as it is possible

EDUCATION

State schools succumb to state corporatism and wokism whereas private schools are shaped by parents' desires for their children. Parents will receive vouchers for use in state or private schools.

Boarding schools outlawed as they foster a lack of empathy. Children need family and a mix of local friends to develop fully emotionally

IMMIGRATION

Immigration is used to undermine the nation and society so enabling control. There are two strategies. One, Navy and Coast Guard Service to prevent illegal boats entered territorial waters. Two we must recognise that people want to escape their own countries where these have been subjugated by neo-colonialism. This we address by granted aid to be used to develop high value industry which will lead to prosperity in these countries

VICE

Vice [prostitution, recreational drug taking, gambling] made legal but subject to government control which shall be as strict as the nature of the vice make necessary. Users can take their normal place in society

ENERGY

Climate change scam recognised and all "green revolution" measures reversed. Coal, nuclear energy and LENR [low energy nuclear reactors], formerly known as cold fusion, to be adopted and long term developed

TAX HAVENS

His Majesty's tax havens and their banks shut down and investigated. Islands made part of the UK and used as holiday resorts and other suitable industries

PROGRESSIVE CORPORATION TAX

Progressive corporation tax so that larger companies pay a higher rate. This is only fair as they are the biggest consumers of government services and often the biggest polluters. Thus SMEs, which all studies show are the real drivers of employment and economic innovation, will benefit.

INHERITANCE TAX

Abolish inheritance tax. Families and companies should have the right to accumulate wealth across generations. This is beneficial to the nation and fair. Because of capital controls the rich must keep their money in the UK
